Loose - Green Tea

November 20, 2025

CUP CHARACTERISTICS: Smooth with delicate and pleasing flavor and a heavenly jasmine character.

INGREDIENTS: Green tea, Jasmine petals

INGREDIENTS FROM: China

REGION(S): Fujian Province

GROWING ALTITUDES: 1500 - 4900 feet above sea level

GRADE(S): Artisan Handcrafted

MANUFACTURE TYPE(S): Non fermented, Traditional process, Small batch crafted, Hand formed

ANTIOXIDANT LEVEL: High

CAFFEINE LEVEL: Low

KOSHER: Yes

VEGETARIAN: Yes

VEGAN: Yes

ARTISANAL NOTES: Small batch blended and packed in Canada at The Metropolitan Tea Company.

INFUSION: Pale green liquor

INFORMATION:

Jasmine Dragon Tears are a green tea and are made from the top two leaves and the bud of new season growth (Late March /early April). These delicate leaves are then hand rolled into the small pearls. When you infuse these pearls in your tea cup, you will see the top two leaves and the bud come to life. In fact you will see some small 'hairy down' on the bud of the leaves - this denotes superb quality and very careful and delicate handling.

The extraordinary flavour of these Jasmine Dragon Tears is due to the time of plucking, manufacture and the fresh spring jasmine blooms. The new tea season starts in China in late March/early April (dependent on weather patterns) and it is during the first 4 weeks that the best teas are manufactured. After this initial period the quality of the teas and green leaf start to deteriorate rapidly and the teas become quite plain. Dragon Pearls are only made from tea plucked in the first 3 weeks of the new season. Coinciding with the new tea growth, the jasmine bushes are in spring bloom. Only the most fragrant blossoms are used (from bushes that are known to produce the most fragrant flowers). These fresh flowers are layered between the tea and before long the intense and uplifting fragrance of the new jasmine blooms is passed on to the tea. An extraordinary taste experience!

STEEPING TIME

TEA CUP	8oz (237ml)	10oz (296ml)	12oz (355ml)
AMOUNT	1 heaping teaspoon of "The Perfect Measure Spoon" (Item# 11MS-1370-)	1 heaping teaspoon of "The Perfect Measure Spoon" (Item# 11MS-1370-)	1.5 heaping teaspoon of "The Perfect Measure Spoon" (Item# 11MS-1370-)

Loose - Green Tea

IDEAL BREWING TEMPERATURE: 85°C/185°F. For Food Safety reasons bring water to 100°C/212°F and let it cool down to 85°C/185°F.

HOT BREWING METHOD:

Bring filtered or freshly drawn cold water to a rolling boil. Place 1 slightly heaping teaspoon of loose tea for each 7-9oz / 200-260ml of fluid volume in the teapot. Pour the boiling water into the teapot. Cover and let steep for 3-7 minutes according to taste (the longer the steeping time the stronger the tea).

ICED TEA BREWING METHOD (Pitcher): (To Make 1 Liter/Quart):

Place 6 slightly heaping teaspoons of loose tea or 6 tea bags into a teapot or heat resistant pitcher. Using filtered or freshly drawn cold water, boil and pour 11/4 cups/315ml over the tea. Steep for 5 minutes. Quarter fill a serving pitcher with cold water. Pour the tea into your serving pitcher straining the tea or removing the tea bags. Add ice and top-up the pitcher with cold water. A rule of thumb when preparing fresh brewed iced tea is to increase the strength of hot tea since it will be poured over ice and diluted with cold water. (Note: Some luxury quality teas may turn cloudy when poured over ice. This is a sign of luxury quality and nothing to worry about!)

ICED TEA BREWING METHOD (Individual Serving):

Place 1 slightly heaping teaspoon of loose tea or 1 tea bag into a teapot for each serving required. Using filtered or freshly drawn cold water, boil and pour 6-7oz/170-200ml per serving over the tea. Cover and let steep for 5 minutes. Add hot tea to a 12oz/375ml acrylic glass filled with ice, straining the tea or removing the bags. Not all of the tea will fit, allowing for approximately an additional ½ serving. A rule of thumb when preparing fresh brewed iced tea is to increase the strength of hot tea since it will be poured over ice and diluted. (Note: Some luxury quality teas may turn cloudy when poured over ice. This is a sign of luxury quality and nothing to worry about!)

FOOD SAFETY ADVISORY: We strongly recommend using filtered or freshly drawn cold water brought to a rolling boil when brewing all types of tea. Today's water has been known to carry viruses, parasites and bacteria. Boiling the water will kill these elements and reduce the potential incidence of water-borne illnesses.

RECOMMENDATION: We recommend the use of our '1 Cup of Perfect Tea' measuring spoon (Item# 11MS-1370) for best results. Please contact Metropolitan Tea to place an order.

ANTIOXIDANT BENEFIT: For a greater antioxidant benefit brew longer and use more tea.
